PTFE MEMBRANE

TITANIUM PTFE BARRIER MEMBRANES

Ti-PTFE

Regenerative Membranes are sterile non absorbable membranes made from polytetrafluoroethylene (PTFE) polymer reinforced with a medical grade Titanium frame embedded between two layers of PTFE.

Ti-PTFE

Regenerative Membranes for Guided Bone Regeneration (GBR) help in bone neoformation acting as biological barriers to prevent migration from epithelium, the conjunctive tissue and/or bacteria that might cause bone growth inhibition, promoting an adequate space for the formation of a natural fibrin under-structure, precursor of the bone tissue.

Ti-PTFE

Regenerative Membranes are temporarily implantable material used in periodontics, implantology and any dental surgical procedure that requires a mechanical barrier, especially for bone reconstructions.

The membranes provide a mechanism for the ingrowth of new soft and hard tissues and they are used as a space making barrier for the treatment of periodontal defects.

PTFE BARRIER MEMBRANES

PTFE

Regenerative Membranes are sterile non absorbable membranes made from polytetrafluoroethylene (PTFE) polymer.

PTFE

Regenerative Membranes for Guided Tissue Regeneration (GTR) are used to prevent migration of cells from epithelial and/or connective tissues, that could cause bone growth inhibition, thus providing a proper space for the formation of a natural fibrin structure, which is the bone precursor.

PTFE

Regenerative Membranes are temporarily implantable material used in periodontics, implantology and any dental surgical procedure that requires a mechanical barrier.

The membranes provide a mechanism for the ingrowth of new soft tissues and they are used as a space making barrier for the treatment of periodontal defects.

Titanium Reinforced

Posterior Singles L
30mm x 40mm

Titanium Reinforced

Anterior Singles
14mm x 24mm

Titanium Reinforced

Posterior Singles
20mm x 25mm

Titanium Reinforced

Buccal Singles
17mm x 24mm x 8mm

Non Reinforced

25mm x 30mm

MEMBRANE FIXATION TOOLS

PINS

TITANIUM MICRO PINS (3mm)

- Tissue Comfort guaranteed by low profile head of the Micro pin
- Micro coils for bone fixation
- Convenient blister autoclavable

TITANIUM MICRO PINS (3mm)

SCREWS

TITANIUM MICRO SCREWS (4mm)

- Cylindrical head screw
- Inner square insert for firm grip and safe screwing/ unscrewing
- Higher performance tip, greater cortical penetration

TITANIUM MICRO SCREWS (4mm)

STRAIGHT DRIVER FOR MICRO PINS

SCREWDRIVER WITH CHANGEABLE OR NON CHANGEABLE TIP
